FLOOD ALLEVIATION SERVICES

Jointline delivers expert engineering solutions, from surface drainage and attenuation tanks to bunding, swales, channels, and outfall construction, aimed at safeguarding highways, utility sites, and public realm infrastructure against flooding and water damage. All works are executed with precision and care to maintain site resilience and regulatory compliance.

Key Benefits:

- Custom Water Management Systems: Including attenuation tanks, SuDS, bunds, and channel construction
- Infrastructure Protection: Prevents surface-water and flood damage to highways, public spaces, and utilities
- Regulatory Compliance: Engineered to meet Environment Agency and local authority standards
- Minimal Site Disruption: Thoughtful planning ensures continuity during installation
- Flexible Applications: Suitable for highways upgrades, utility zones, and public realm projects

Why Choose Jointline:

- 30+ Years of Civil Engineering Expertise: Proven flood and drainage delivery for infrastructure schemes
- Specialist In-House Teams & Plant: Full control from design through installation, using dedicated equipment
- Accredited Quality Management: ISO 9001, 14001, and 45001-certified processes
- Rapid Response Capability: Effective mobilisation for urgent and weather-sensitive works

Let us help you take your project to the next level. **Contact us today** to discover how our flood alleviation services can make a difference.
