

HIGHWAYS HYDROBLASTING SERVICES

Get in Touch!

Jointline delivers precision hydroblasting solutions for highways and infrastructure environments using ultra-high-pressure water technology. Ideal for removing failed markings, surface coatings, bitumen, and rubber deposits, hydroblasting offers a clean, non-destructive method that reduces environmental impact and maintains road user safety.

Key Benefits:

- Removes markings, surface coatings, and contaminants without damaging the surface
- Supports rapid resurfacing, re-marking, or surface treatment preparation
- Fully self-contained units with water recovery and filtration systems
- Ideal for concrete and asphalt carriageways, cycleways, crossings, and runways
- Reduces environmental impact compared to abrasive or chemical alternatives
- Carried out safely in live highways environments with minimal disruption

Why Choose Jointline:

- 30+ years' experience in highways maintenance and surface preparation
- In-house hydroblasting fleet with ultra-high-pressure capabilities
- ISO 9001, 14001, and 45001 accredited
- Operatives qualified under NHSS and NRSWA schemes
- Trusted delivery partner to local authorities and term maintenance contractors across the UK's road and infrastructure networks.

Let us help you take your project to the next level. **Contact us today** to discover how our highways hydroblasting services can make a difference.
