

JOINT SEALING SERVICES

Get in Touch!

Jointline delivers professional joint sealing services across military and civilian airfields, supporting new concrete pours, reinstatement works, and long-term maintenance. Our in-house teams use proven materials and specialist application techniques to prevent water ingress, resist joint movement, and preserve structural integrity.

Key Benefits:

- Compliant with CAA, MOD and ICAO specifications
- Suitable for construction, expansion, and reinstatement joints
- Prevents water ingress, FOD generation, and freeze-thaw damage
- Compatible with concrete, asphalt, and hybrid surfaces
- Fast, clean application by experienced, air side-qualified teams
- Integrates seamlessly with line marking, grooving, and surfacing services

Why Choose Jointline:

- 30+ Years of specialist experience in airfield and infrastructure sealing
- In-house equipment and operatives for full delivery control
- ISO-certified to 9001, 14001, and 45001 standards
- Air side-approved and MOD-cleared teams
- Trusted by airports, contractors, and defence clients nationwide

Let us help you take your project to the next level. **Contact us today** to discover how our quality joint sealing services can make a difference.
