

OVERBANDING SERVICES

Get in Touch!

Jointline provides compliant overbanding treatments to protect and prolong the life of pavement joints and reinstatements across military and civilian airfields. Applied by airside-qualified teams using approved materials, this essential maintenance treatment prevents water ingress, reduces crack propagation, and supports ongoing airfield resilience.

Key Benefits:

- Compliant with MOD, CAA, and ICAO standards
- Prevents ingress of water, fuel, oil, and chemicals
- Extends pavement life by sealing exposed joints and edges
- Applied with anti-skid finishes for operational safety
- Suitable for asphalt and concrete surfaces
- Minimal disruption in live environments

Why Choose Jointline:

- 30+ Years of specialist experience in airfield maintenance
- Accredited to ISO 9001, 14001, and 45001
- Airside-cleared teams with proven delivery track record
- Approved materials and precision application equipment
- Integrated service offering with joint sealing, line marking, and surfacing

Let us help you take your project to the next level. **Contact us today** to discover how our specialist overbanding services can make a difference.
