

STEEL EXPANSION JOINTS **SERVICES**

Get in Touch!

Jointline supplies and installs heavy-duty mechanical expansion joint systems for warehouses, distribution centres, autonomous operation facilities and other high-load environments. Designed to accommodate structural movement while protecting joint edges, these all-metal systems provide a durable, low-maintenance alternative to conventional joint sealing.

Key Benefits:

- Durable all-metal system designed for long-term performance in high-load environments.
- Accommodates structural movement while protecting joint edges and maintaining a smooth running surface.
- Suitable for autonomous vehicles, intensive traffic, including HGVs, forklifts, pallet trucks and material handling equipment.
- Reduces joint deterioration, surface damage and ongoing maintenance compared to conventional sealants.
- Ideal for warehouses, distribution centres, airports and industrial facilities requiring reliable, long-lasting expansion joint solutions.

Why Choose Jointline:

- Over 30 years of experience delivering specialist infrastructure solutions across highways, aviation, industrial and commercial sectors.
- Specialist installation expertise in heavy-duty mechanical expansion joint systems for demanding operational environments.
- Efficient project delivery with experienced, directly employed teams, minimising disruption to day-to-day operations.
- Quality, safety and reliability at the forefront of every project, delivering durable solutions that reduce whole-life maintenance costs.
